The PF-10 Lightweight King Pin Lock

For any trailer with king pin hitch

An incredibly secure yet light, practical and portable hardened carbon steel alloy king pin lock. It used to be common knowledge that you simply couldn't rely on anything in this price range.

Includes a high security cylinder and two keys, keyed alike available.

Includes reflective hang flag

Includes a high quality, secure lock that is made in the USA

Conical shape deflects impacts

Advantages of regular version :

Incredible simple, portable and easy to use

Extremely high security and rugged key system

Can be ordered keyed alike, or keyed different.

Resistant to freezing, drilling, modified 5th wheels and all kinds of impacts

Available with a specially formulated lock lubricant that prevents freezing

Detailed specifications:

- Weight : 8 lbs
- Material: Carbon Alloy Steel
- Keyless installation/removal, takes 2 seconds.
- Highly reflective metal hang-flag and carrying handle also provided
- Special high security key system allows keyed alike:
- Padlocks, fuel tank locks, hockey-puck locks, etc.

Current Users

- Transport companies
- Manufacturing companies
- Independant owner-operators
- Utilities or power rental companies.

Installation Instructions :

1. Insert the key fully, turn and pull to unlock cylinder.

2. Lift the king pin lock onto the pin

3. Push the cylinder in until it clicks

4. Installation is complete!
